

RP43Si

A medium temperature smoke seal that is designed to suit automatic sliding door operated, frameless glass and metal frame doors.

Comprising of two sealing sections, the RP43Si is fitted in an overlap configuration to effectively seal the vertical gap between the fixed and active sliding door leaf.

- 15µm satin clear anodised aluminium holders
- Seals gaps 30 to 50mm
- Easy, self adhesive* installation to glass or metal
- Antimicrobial additive

Registered Design

RP105

A weather and energy seal that is designed to suit automatic sliding door operated, frameless glass and metal frame doors.

Comprising of two sealing sections, the RP105 is fitted in an overlap configuration to effectively seal the vertical gap between the fixed and active sliding door leaf.

- A heavy duty, clear co-polymer fin seal for weather and energy applications
- Seals gaps 15 to 28mm
- Easy, self adhesive* installation to glass or metal

* Contact surface must be clean, smooth and if painted, well cured. Self adhesive seals will not adhere properly to oiled or alkyd finishes or to easy care surface treatments that contain silicon or teflon.
